Aquatec Maxcon New Zealand is a technical solution and service provider. Aquatec Maxcon New Zealand is part of the Aquatec Maxcon Group which has over 50 Engineers and more than 300 Staff internationally. The Aquatec Maxcon Group is focused on the design and delivery of water and wastewater treatment equipment, we are 100% focused on the design and supply of water and wastewater treatment products. Following our first project success in Wellington in 1989, we subsequently launched Aquatec Maxcon New Zealand in 1996.

Porirua (in the Wellington Region of the North Island of New Zealand) (1 x 18 ML Ditch, 75,000 EP)

Partners & Services

The Aquatec Maxcon Group focuses on the manufacturing, supply, and servicing of water and wastewater products. With our international partners Trojan Technologies & VIQUA UV Products , Howden Turbo Blowers, Fluence Corporation MABR membranes, AWI Filter floors and Nereda Granular Sludge technology as well as our own patented technologies including Aquablade strip diffusers, clarifiers, surface aerators and decanters, we can solve every water and wastewater problem.

Experience

We openly and proactively work with consultants to identify and recommend international best practice products for inclusion into whole of plant design. Collectively, our team of international service experts have over 100 years of hands-on knowledge supporting high cost and high value assets for our clients. We are owned 100% by our staff and have a never walk away attitude.

Our key technologies can be grouped into 4 general categories as listed below:
