Aquatec Maxcon is excited to announce that Chinchilla Wastewater Treatment Plant (WWTP) completed the performance testing and is exceeded expectations in its 6months operation in meeting effluent quality and operating cost.

Chinchilla WWTP has a capacity of 10,000EP and is the third plant built by Aquatec Maxcon for the Western Downs Regional Council. It utilises our innovative proprietary Hybrid BNR process that offers a lower construction cost and provides operational robustness and a high degree of process flexibility.

Aquatec Maxcon Group was responsible for the delivery of the entire project including Design, Project Management, Civil, Mechanical and Electricals Works.ree of process flexibility.
