

Aquatec Maxcon has applied its aforementioned water treatment technologies to provide effective solutions to many challenging water quality issues in Australia and abroad.

These water treatment solutions have been provided to the industry in various project delivery forms including - Project Alliancing, Design-and-Construct, Construct Only and other client / contractor relationship based forms.

We value your enquiry for water treatment technologies and equipment from Aquatec Maxcon.

Please refer to the listing of some of the conventional WTP's successfully completed by Aquatec Maxcon below.
