Aquatec Maxcon is one of Australasia's leading suppliers of aeration equipment with more than 47 years' experience in the treatment of wastewater. We have manufactured more than 700 vertical shaft surface aerators giving us an unequalled installation list. Our firm utilises this unique base to deliver unrivalled experience in the design and manufacture of vertical shaft aerators suited to a wide range of applications.

Our range of vertical shaft surface aerators include:

- AquaStar - suited to a large range of applications from high intensity enclosed tanks to floating in extended aeration lagoons.
- AquaSAL - specifically designed to provide high efficiency aeration and trench velocity in oxidation ditch applications.
